MICROFILM COPYING

Army Medical Library  
Washington, D.C.

Microfilm copying of the periodical literature of the Army Medical Library was begun by Bibliofilm Service of the U.S. Department of Agriculture in 1936 and continued until September 1940 when an independent service under the auspices of the Friends of the Army Medical Library was established. Due to the expanding needs of microfilm copying for Regular Army and Federal establishments and other calls made upon it in the present emergency, additional equipment and enlarged facilities have been added at public expense. It has now become possible to substitute microfilm copying to a limited extent for interlibrary loans. Microfilms will be sent without charge in lieu of the loan of the books to all accredited medical librarians who prefer them or where books or journals cannot be loaned.

This service should result in a saving for the borrowing librarian since the responsibility for safekeeping and return of the books will be eliminated and no records will be required. The person receiving the microfilm will have no obligation for its return and may retain it for future use.

The total amount of work which can be done on this basis is of course limited by appropriations now available, hence there will be a limitation in the extent of the service, as to quantity. Orders for microfilm copying, except in particular cases, where bulk or commercial work is involved, will not ordinarily be accepted from individuals, but only through libraries, in the same manner as interlibrary loans.

The following postage should be included with each order for microfilm:

Articles totaling up to & including 100 p.	send.... 1½¢
" " " " " 400 p.	" .... 3¢
" " " " " over 400 p.	send 4 1½¢ stamps... 6¢

Send orders to:
